

CIPANP 2006

CIPANP 2006 Support for Young Scientists

We anticipate having a small amount of funding to support the participation of young scientists (students and postdocs) at CIPANP 2006. To take advantage of any of the following opportunities, please visit the Contact Us page and send us your request. Include in the subject field the words “Student Support” or “Young Scientist Support.” Indicate in the body of the message your present status, university, adviser, and area of expertise. If you are planning to give or have been invited to give a presentation, please let us know.

We plan to offer a unique short course on “Physics Communication Skills,” where experts will offer tips on the preparation of talks, papers, figures, and proposals. Additional discussions will include scientific ethics and career planning. The program will be open to all interested young scientists at no additional charge. However, for planning purposes, we need to know if you wish to participate in any or all of the sessions, which will take place daily for ~1 hour during a portion of one of the parallel session time slots. Please also tell us which topics are of the most interest to you.

A reduced registration fee of \$250 will be offered to all students. (We are sorry, but the student fee does not apply to postdocs.) To obtain the student fee, simply choose the “Student Registration” option on the normal registration web page. While this registration fee includes the opening reception, four lunches, coffee breaks, and the proceedings, it does not include the Friday night banquet. A reduced-fee banquet ticket may be purchased separately for \$50.

A block of reduced-rate, shared rooms has been reserved for young scientists. After April 21, discounted room rates are subject to availability. To request consideration for such a room, please indicate so on the Contact Us form.

We have a small amount of funding set aside to help fund student registrations and lodging, and we are seeking additional contributions. If you are interested in applying for partial support to defray registration and lodging for the conference, we require a short (email) letter of support from your adviser. Priority will be given to students who are giving talks, followed by young scientists (postdocs) who are giving talks. Your institution may also be able to assist you with travel funds—ask early!
